QUEENSLAND STATE SCHOOL ELECTRICAL UPGRADES

Davitt Pty Ltd successfully coordinated completion of 17 electrical upgrades within Queensland State Schools, prior to completion and with minimal disruption, by providing the following:

- Pre-planning which involved:
 - Determining clients needs/ requirements
 - Identifying possible risks
 - Identifying and allocating resource subject to availability
 - Allocating staff to each site on the basis of skill mix and availability
 - Developing necessary work plans/ tasks required to reach the milestones
 - Estimating work content and expected duration of particular tasks
 - Scheduling activities within the project plan according to priority

- Collecting and disseminating performance information in the form of status reports, progress measurement and forecasting
- Liaising with preferred suppliers to ensure the availability of resources
- Conducting regular management meetings
- Conducting regular toolbox meetings every morning with staff
- Training subordinate management to lead smaller teams

As a result, all schools were satisfied and we have been invited back for follow-on work.

INFRASTRUCTURE...

We have had extensive involvement in a number of large contracts for which we have implemented rigid procedural practices that maintain coordination of relevant legislative requirements, practices and standards with consideration to external construction and tight deadlines.

Examples of other infrastructure projects we have been contracted to undertake include:

- Working with Vision Stream to remove all Telstra Assets from Energex assets on
- all high and low speed public road systems throughout Ipswich
- Electrical upgrades of 17 Queensland State Schools [Link to overview and photos](#)
- Construction of system infrastructure for Education Queensland.
- Construction of system infrastructure for Ergon and Energex
- Construction of system infrastructure for Mains Roads [Link to overview and photos](#)
- Withcott Quarries - See image gallery left
